

Pet Policy

Nursery currently does not have any pets.

We do have opportunities where we have tadpoles or caterpillars in nursery to watch them grow and develop. Children are encouraged to observe and hold where applicable to learn about nature.

We do on occasions have pet visits into nursery including dogs, lambs, rabbits, tortoise and occasionally have visits from external bodies. On these occasions we ensure all children are supervised and hands are washed before and after handling any pets. The animal hygiene is monitored throughout and any mess is cleaned up immediately in the same way as any other spillage in accordance with our hygiene policy and procedure. Parents are given advance warning of any animals coming into nursery via, letters, website and app notifications.

Alcohol gel is recommended for use with pet / animal care after washing hands NOT as an alternative!
